Internship Experience

Cyber Security Intern In RDL Technologies Pvt. Ltd.

Worked on developing a Root Cause Analyzer system for centralized log monitoring, incident detection, and security analysis. Designed a system to collect logs from multiple devices/servers, analyze abnormal events, detect incidents such as unauthorized access, network failures, and application issues, and identify the root cause using correlation logic and fault tree analysis. Built an interactive dashboard for real-time monitoring, incident management, reporting, and visualization of logs and alerts. Gained hands-on experience in cyber security monitoring, log analysis, and incident response workflows.

Tools and Technologies Used: Python, Flask, Pandas, CSS3, JavaScript, CSV/Log Files, Windows Event Logs.

Education

Sahyadri College Of Engineering And Management, Mangaluru

Bachelor of Engineering, Information Science and Engineering

2022–26

CGPA: 8.28

Shri BGS Science and Commerce PU College, Balehonnur

2022

Percentage: 82

Shri BGS English Medium High School, Balehonnur

2020

Percentage: 81.76

Technical Skills and Interests

Languages: Java , C , HTML , CSS , Python

Developer Tools: VS Code , Github , Jupyter Notebook , Canva

Cloud/Databases: MySQL , MongoDB , Azure

Soft Skills: Problem Solving , Learning Agility , Adaptability

Areas of Interest: Web Development , Data Analytics

Projects

Vehicle Rental System

A DBMS-based web application to manage vehicle rentals, enabling users to book vehicles and admins to manage listings. Designed a structured relational schema, implemented user and admin modules, and ensured seamless rental operations using MySQL, Node.js, and front-end technologies.

Tools and Technologies Used: HTML5, CSS3, JavaScript, Node.js (Express), MySQL, Visual Studio Code.

College Data Entry Portal

Developed a role-based internal portal for our college using Next.js and SQL to streamline academic and institutional data management. The system supports department and program setup, with ongoing implementation of faculty and performance modules. Focused on clean UI, secure multi-role access, structured data flow, and improving efficiency in administrative workflows across departments.

Tools and technologies used: HTML, CSS, Next.js, MySQL.

AGRI-MART: Connecting Farmers and Consumers

AGRI-MART is a platform that connects farmers directly with consumers, helping them sell fresh produce without middlemen. It supports fair prices for farmers and gives consumers access to quality farm products.

Tools and Technologies Used: HTML5, CSS3, JavaScript, MySQL, Visual Studio Code.
